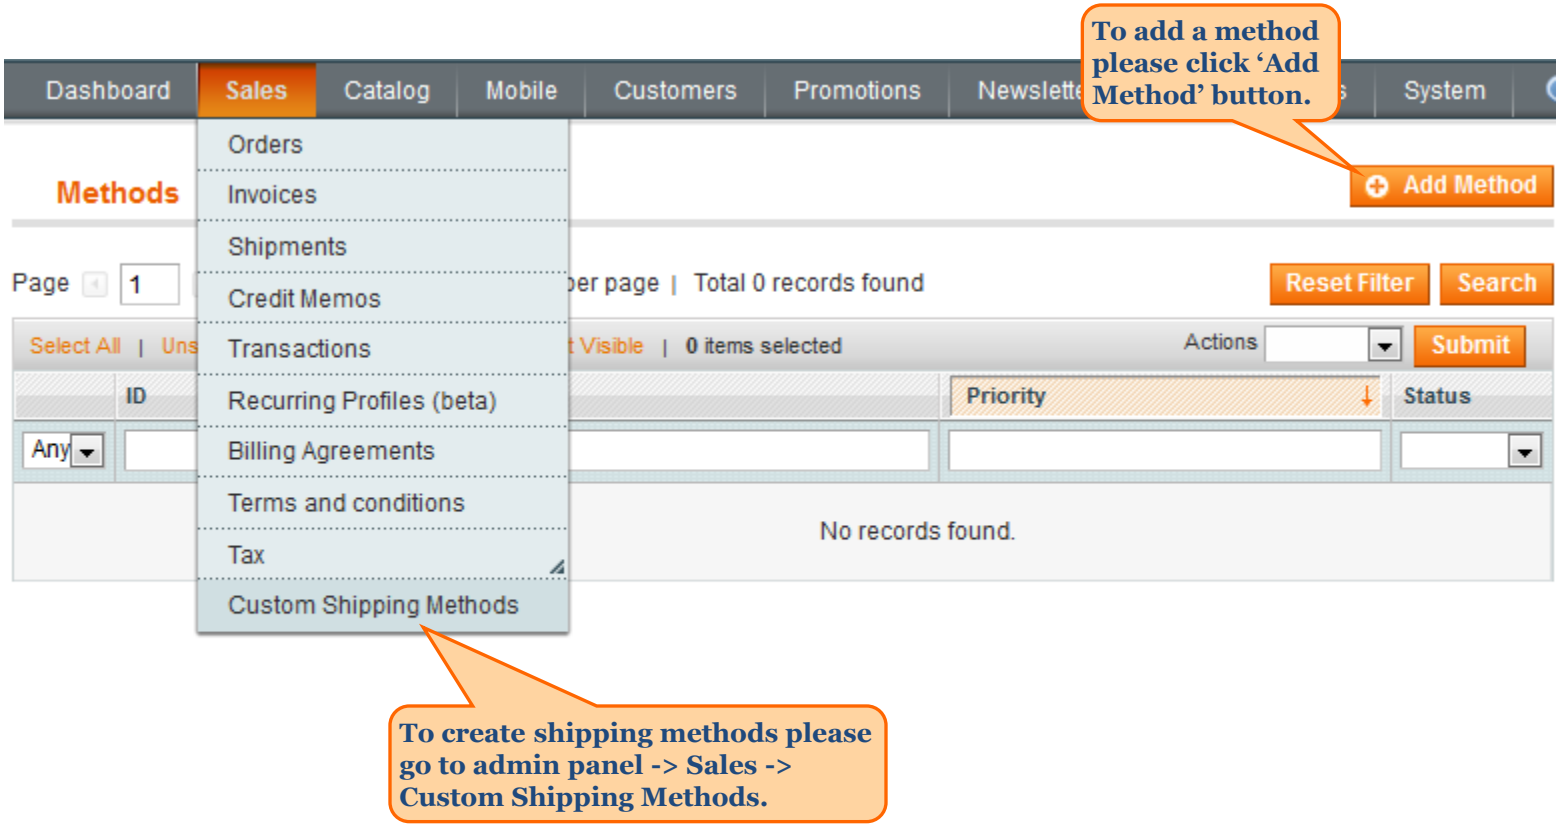
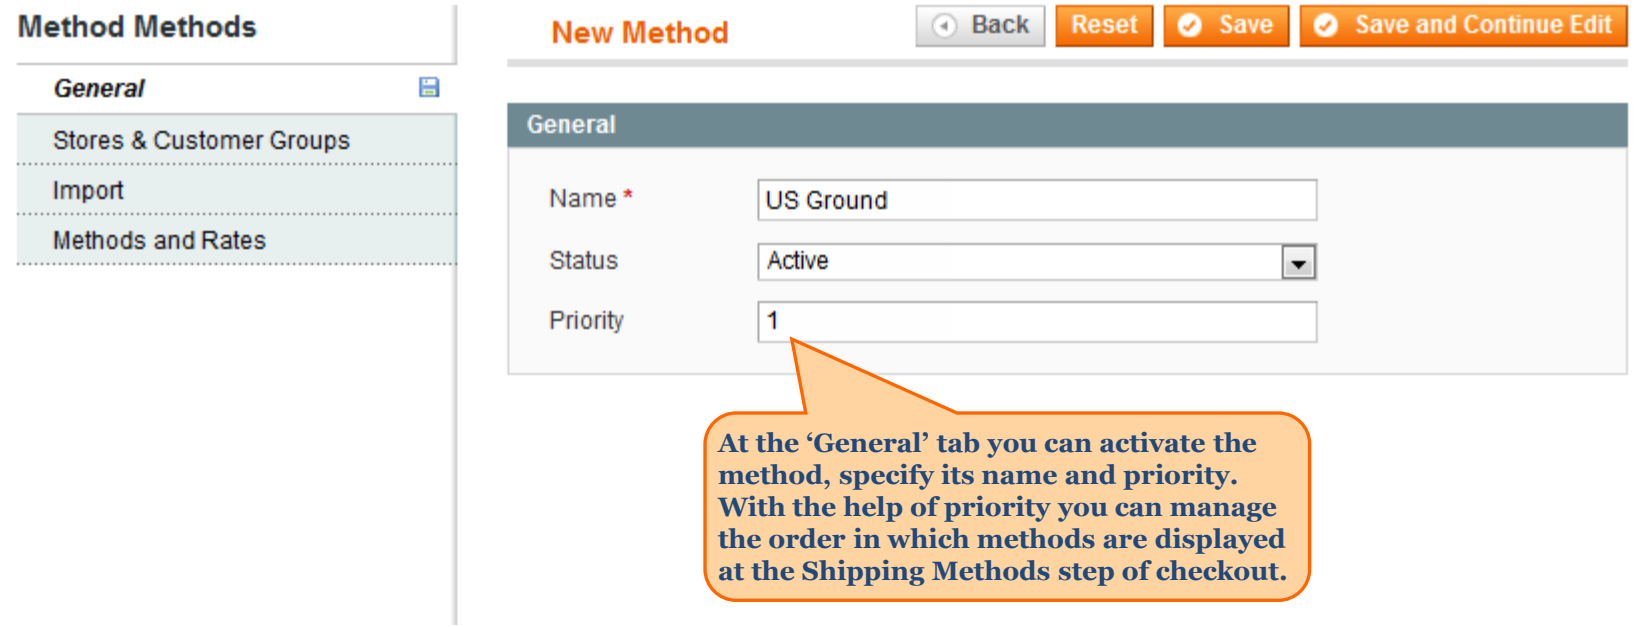
1. Where to create custom shipping methods



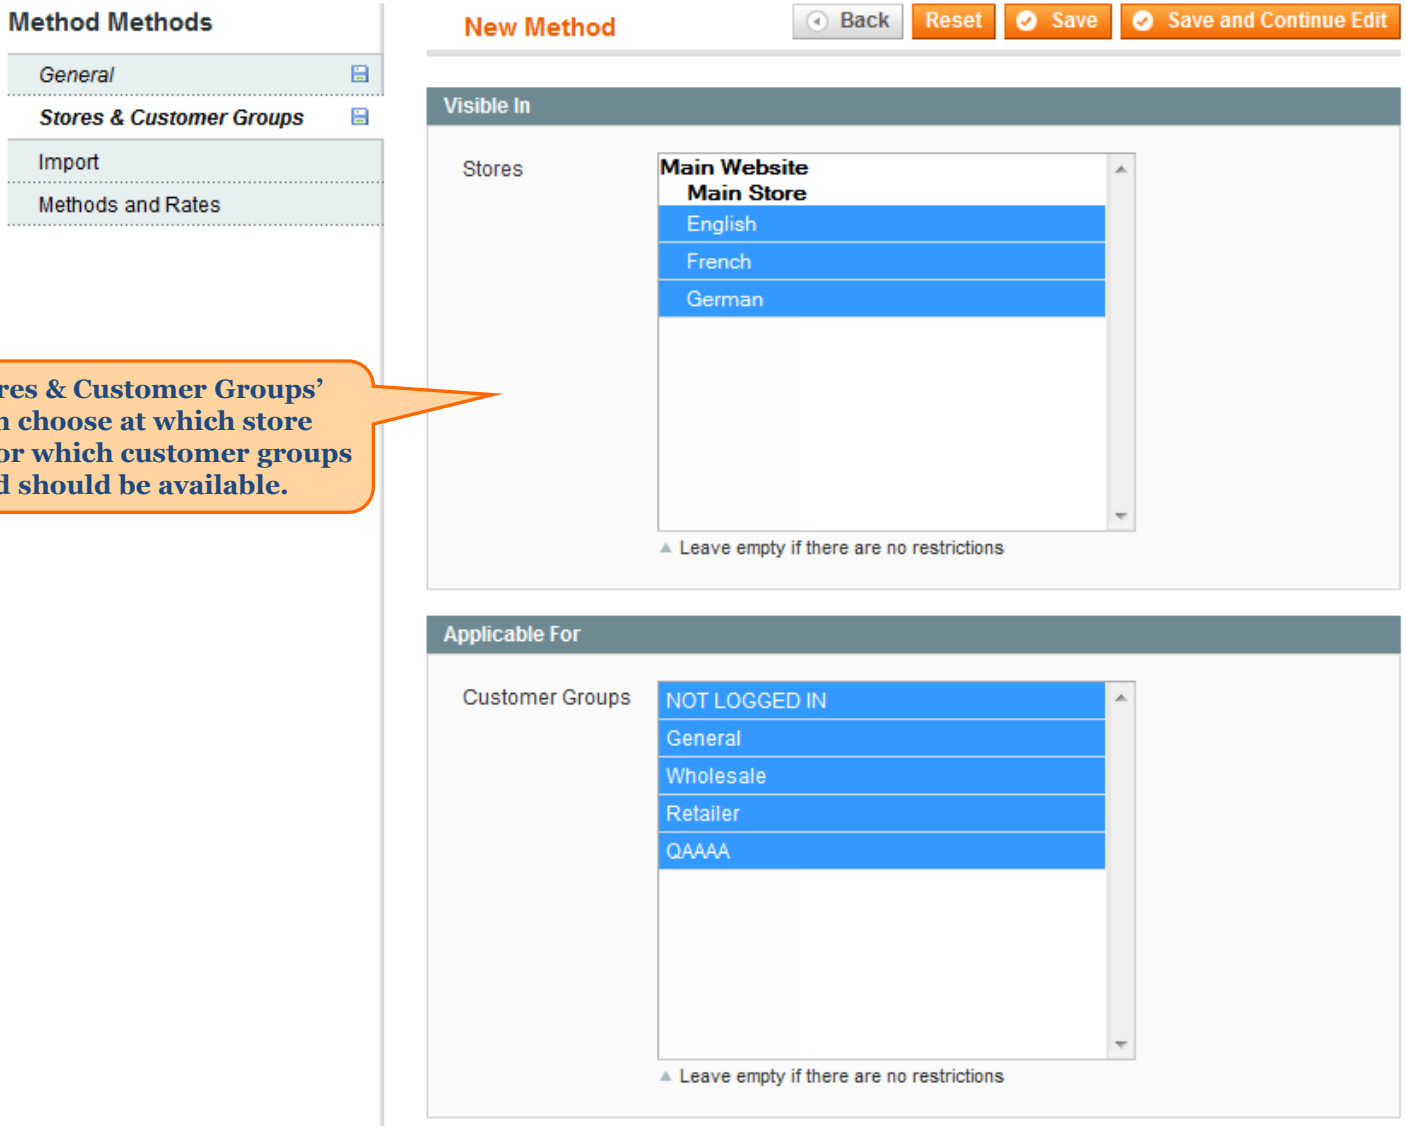
Copyright © 2012 amasty.com

2. General method information



Copyright © 2012 amasty.com

3. Select store view and customer groups



At the 'Stores & Customer Groups' tab you can choose at which store view and for which customer groups the method should be available.

4. Import CSV file with shipping rates

At the 'Import' tab you can import csv file with the rates information. You can find sample csv file at the specified url and within the extension package. Please see the next pages for explanation on csv structure.

If you set 'Delete Existing Rates' option to 'Yes', all rates previously imported for this method, will be deleted.

5. View imported rates

At the 'Methods and Rates' tab you can view the imported rates. You can see address, price, quantity, weight and shipping rate data here.

'Rate' column – means base rate for the order which qualifies for the specified address, product price, weight and quantity. In this case the flat rate of 12 will be applied to order shipped to Arkansas, with total product price between 33 and 880, quantity between 2 and 2000, etc.

'PPP' column – percent per price. In this situation shipping will be calculated as 3% of total product price.

'FRPP' column – flat rate per product. Flat shipping rate of 7 will be added for each product within the order.

'FRPUW' column – flat rate per unit of weight. Flat shipping rate of 0.1 will be multiplied by the weight off all products within the order. If the order weight is 15 pounds (or kilograms), the price of shipping will be 1.5.

'Rate', 'PPP' and 'FRPP' and 'FRPUW' are added to each other, so in our situation shipping will be calculated as 12 per order plus 3 percent of total product price plus flat rate of 7 for each product. So if we have 3 products which together cost 200 and weigh 10 pounds, shipping price will be: 40 = 12 (flat rate per order) + 6 (3% of product price) + 21 (7 per product) + 1 (0.1* 10 pounds)

Country	State	City	Zip From	Zip To	Price From	Price To	Qty From	Qty To	Weight From	Weight To	Rate	PPP	FRPP	FRPUW	Action
United States	United States/Arkansas			20000	33.00	880.00	2	2000	1.0000	1000.0000	12.00	3.00	7.00	0.10	Delete
United States	United States/Massachusetts			20000	33.00	880.00	2	2000	1.0000	1000.0000	10.00	2.00	7.00	0.10	Delete
United States	United States/New Jersey			20000	33.00	880.00	2	2000	1.0000	1000.0000	7.00	1.00	4.00	0.10	Delete

7. Example of csv file with rates

```
"US", "AR", "*", "*", "20000", "33", "880", "1", "1000", "2", "2000", "12", "3", "7", "0.1"
"US", "MA", "*", "*", "20000", "33", "880", "1", "1000", "2", "2000", "10", "2", "7", "0.1"
"US", "NJ", "*", "*", "20000", "33", "880", "1", "1000", "2", "2000", "7", "1", "4", "0.1"
```

In the csv file please specify a value for each column of 'Methods and Rates' tab. You can find sample csv file within the extension package or at http://amasty.com/examples/tablerates.csv

If you use "*" symbol for some column, it means that the rate will be applied to all values of this parameter. For example if you specify "*" for zip column, the rates will be applied to order with any zip code.
