You can choose editing mode. When 'Single Cell' mode is selected, modifications are automatically saved one by one. With 'Multi Cell' enabled, you can save multiple edits in one go.

This setting allows to add different attribute columns to the grid for different admin users. It is very convenient if you have several product admins – each of them can add the column which are necessary for him or her.

When this option is set to 'Yes', you can edit product attributes right on the product grid.

At the moment single cell editing is enabled. To edit some information (e.g. price) just click on the field you would like to edit. After you've entered the necessary info, please click any spot outside the field for the data to get saved.

8. Edit products right on the product grid

After you've entered the necessary info, please click 'Save' button and all the modified data will be saved. Multiple cell editing is more convenient when you edit larger volumes of information.
